High Performance Facials

DMK therapy oxygenates and detoxifies the skin to repair skin function based on the revolutionary concept to Remove, Rebuild, Protect and Maintain. Utilising the beneficial effects of transfer messenger enzymes to encourage superficial blood circulation and lymphatic drainage through the process of reverse osmosis, helping to flush toxins and stimulate collagen production. Formulated to suite all skin types DMK is designed to optimize skin fitness and create long-lasting results.

DMK ENZYME THERAPY FACIAL

Beginning with an in-depth skin analysis to customise a suitable treatment plan, enzyme therapy 1 includes a deep cleanse to prepare the skin for a resurfacing treatment to stimulate skin desquamation. Complete with a 45 minute tightening enzyme masque and transdermal infusion, this paramedical facial will assist in restoring epidermal water loss, resulting in a superficial plasmatic effect and dewy, glowing skin.

90 MINUTES \$210

DMK LIFTING THERAPY

DMK's patented muscle-banding technique is designed to fight against the loss of skin elasticity and aging factors to restore cellular structure and improve collagen production. 120 MINUTES \$280

Geno+ oxygen therapy is a three step system to reduce the free-radical effects of aging, leaving the skin with an instant non-surgical facelift. This smart-touch system exfoliates, infuses, and oxygenates the skin using patented TriPollar radio frequency to warm and tighten the skin, micro-derm oxypods to exfoliate and remove dormant skin cells and advanced ultrasonic waves to impart nutrient-rich serums. Designed to release the congestion glycerol to strengthen the collagen matrix. This instantly reduces the appearance of wrinkles and improves overall skin turgidity for a youthful glow.

ANTI-AGING OXYGEN+ THERAPY

Experience rapid anti-aging results with this three-step oxygen infusion therapy. Using advanced hand held instruments to deliver Tripollar radio frequency waves this treatment begins by warming the skin to activate the mitochondria within the cell walls. A personalised capsugen oxypod is then circulated around the face to deeply exfoliate and remove dead skin cells. A cooling gel masque is applied to calm the skin whilst performing a relaxing head massage. The final infusion of nutrient rich creams are imparted using ultrasonic waves to push the products to the deeper layers of the skin for longer lasting results. The increase in blood circulation, exfoliation and infusion of complex nutrients to the skin helps reduce the appearance of aging by stimulating collagen and elastin fiber production. Resulting in less wrinkles, firmer skin tone and a reduction in the appearance of scarring.
